

PAIRING INSTRUCTIONS FOR ACCUPOINT & THE LEGEND

INITIAL STATE
Bluetooth headphones are off.
Detector is off.
AccuPOINT's Bluetooth connection is off.

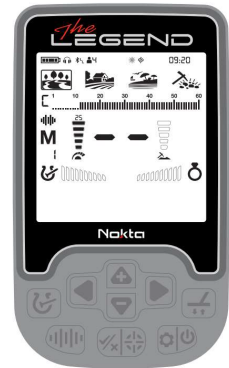

Power on the headphones and be sure that they are in pairing mode indicated by the green LED blinking every second.

Power on the detector and turn the Bluetooth setting on.

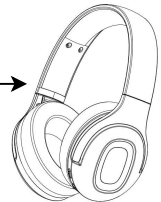

Be sure that the detector is in pairing mode indicated by the blinking Headphones-Bluetooth icon.

After a while, the detector and the headphones will connect, and the Headphones-Bluetooth icon will stop blinking.

Connected →

Power off the detector and the headphones. Then, power the headphones back on. The green LED on the headphones will start blinking.

Disconnected ↯

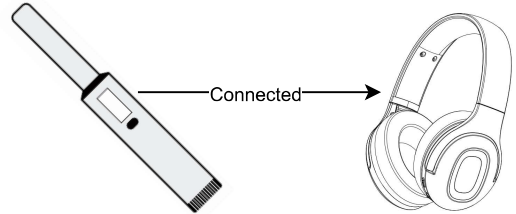

Power on the AccuPOINT and turn the Bluetooth setting on.

The blinking headphones icon indicates that the AccuPOINT is in pairing mode.

After a while, the AccuPOINT and the headphones will connect, and the headphones icon will stop blinking.

Power on the detector.

The Headphones-Bluetooth icon will start blinking indicating that the detector is in pairing mode.

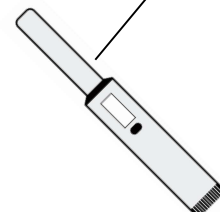

After a while, the Headphones-Bluetooth icon will stop blinking and the headphones will be connected to the detector.

Connected

Connected

At this point, both the AccuPOINT and the detector are connected to Bluetooth headphones.

To switch between the detector and the AccuPOINT just turn on/off the AccuPOINT.
